Summary

A motivated undergrad with a strong foundation in effective communication and technical skills. Excels in collaborative environments. Holding a solid understanding of various technical disciplines, honed through coursework, internships, and hands-on projects. Passionate about leveraging these skills to contribute to meaningful projects and eager to explore opportunities that allow practicing these skills in real-world setting.

Skills

Languages Python, C/C++, JavaScript

Web Dev HTML, CSS, MERN

OS ArchLinux, Kali-Linux, Ubuntu, Debian

Testing Docker, Hyprland

Database SQL, MongoDB

Experience

MyCTO Innovations

May 2024 – June 2024

SEO Content Writer (Intern)

- Optimized website content for SEO and organic search visibility.
- Developed SEO-optimized content that increased visibility on search engines.
- Collaborated with cross-functional teams to create content that was optimized for SEO.

TechEntia

June 2024 – December 2024

Assistant Content Developer

- Applied skills learned from previous experience to this tenure.
- Worked on SEO-optimized content, increasing visibility on search engines.
- Collaborated with cross-functional teams while brushing up new skills such as Figma.

Education

ABES Engineering College, Ghaziabad

Bachelor of Technology (Electronics and Communication Engineering)

Sunbeam School Lahartara, Varanasi

High School Diploma (PCM)

Extracurricular Activities

MINERVA: LitSoc of ABESEC

May 2023 – Present

- Organized club events in various fields like literature, poetry, and debates.
- Inculcated leadership and managerial qualities.

Content Developer at TEDxABESEC'24

Mar 2024 – Jul 2024

- Helped to organize a TEDx event.
- Reviewed and developed content for the needs.
- Inculcated qualities like professionalism, teamwork, and effective communication.

Projects

Automated Time Control Alarm (ATCA) System

- Developed an automated alarm system using Arduino.
- Integrated features such as Wi-Fi control and remote access using Wi-Fi and Bluetooth modules.

Locally Hosted Private AI Server

- Built an AI server using the Llama2 AI model and Open WebUI.
- Incorporated features such as local hosting and stable integration.
- Hosted the server on Linux using Oracle VirtualMachine.

Tuberculosis Detection using ML

- Built a working model for tuberculosis detection using ML in Python.
- Trained the model using datasets and integrated using Convolutional Neural Network (CNN) and integrated an interactive UI with Streamlit.
- Achieved accuracy of 73.037%
